In order to protect crucial raptor nesting sites, exploration, drilling and other development activity within 0.5 mile radius of the sites located in lot 1, NENW Sec. 7; NE, NESE Sec. 8; W2NE, NW, N2SW, NWSE Sec. 9 will be allowed from July 16 to February 28, and not allowed from March 1 through July 15. This limitation does not apply to maintenance and operation of producing wells. Specific exceptions may be granted by the Bureau of Land Management (BLM) if the proposed activity will not seriously disturb wildlife habitat values being protected. This determination will be made by a BLM wildlife habitat biologist in coordination with the Utah Division of Wildlife Resources and, if appropriate, the United States Fish and Wildlife Service. Such a determination may be made if the raptor nest in question is not active at the time of proposed activity. Quite often raptors will have alternate nesting sites available. If a raptor pair is using such an alternative site, it would be necessary to protect the inactive nest from disturbing activities for fluid mineral leasing and exploration. However, it should be noted that all eagle nests, active or inactive, are protected by the Eagle Act and must be left intact and cannot be removed from their original location.

No occupancy or other surface disturbance will be allowed within 330 feet of the centerline or within the 100-year recurrence interval floodplain, whichever is greater, of the perennial streams, or within 660 feet of springs, whether flowing or not. This distance may be modified when specifically approved in writing by the authorized officer of the Bureau of Land Management.

In order to minimize watershed damage, exploration, drilling and other development activity will be allowed only during the period from April 30 to November 1. This limitation does not apply to maintenance and operation of producing wells. Exceptions to this limitation in any year may be specifically approved in writing by the authorized officer of the Bureau of Land Management.

Construction of access roads and drill pads on slopes in excess of 30 percent will require special design standards to minimize watershed damage. Drilling operations and any associated construction activities on slopes in excess of 50 percent may require directional drilling to prevent damage to the watershed. Exceptions to the limitations may be specifically approved in writing by the authorized officer of the Bureau of Land Management.

Raptor surveys will be required whenever surface disturbances and/or occupancy proposed in association with oil/gas exploration occur within a known nesting complex for raptors. Field surveys will be conducted by the lessee/operator as determined by the authorized officer of the Bureau of Land Management. When surveys are required of the lessee/operator, the consultant hired must be found acceptable to the authorized officer prior to the field survey being conducted. Based on the result of the field survey, the authorized officer will determine appropriate buffer zones.

In order to protect critical deer winter range, exploration, drilling, and other development activity in lots 3, 4, SESW, S2SE Sec. 19; S2SW Sec. 20; SWSW Sec. 21 will be allowed only during the period from May 16 to October 31. This limitation does not apply to maintenance and operation of producing wells. Exceptions to this limitation in any year may be specifically approved in writing by the authorized officer of the Bureau of Land Management.

No occupancy or other surface disturbance will be allowed within 330 feet of the centerline or within the 100-year recurrence interval floodplain of the perennial stream Soldier Creek located in portions of lots 3, 4, Sec. 19. NO SURFACE OCCUPANCY STIPULATION – GOLDEN EAGLE NEST SITES

No surface occupancy or use is allowed (does not apply to casual use) within ½ mile of golden eagle nests which have been active within the past two years. This restriction would not apply to maintenance and operation of existing programs and facilities. It would not apply if impacts could be mitigated through other management actions or site specific analysis of terrain features.

On the lands described below:

Sec. 24, E2SE.

For the purpose of:

Protection of golden nest sites as described in the Diamond Mountain Resource Management Plan and EIS. Waivers, exceptions, or modifications to this limitation may be specifically approved in writing by the authorized officer of the Bureau of Land Management if either the resource values change or the lessee/operator demonstrates that adverse impacts can be mitigated. Any changes to this stipulation will be made in accordance with the land use plan and/or the regulatory provisions for such changes. (For guidance on the use of this stipulation see BLM Manual 1624 and 3101 or FS Manual 1950 and 2820.)

TIMING LIMITATION STIPULATION CRUCIAL DEER AND ELK WINTER RANGE

No surface use is allowed within crucial deer and elk winter range during the following time period. This stipulation does not apply to operation and maintenance of production facilities or if animals are not present.

From December 1 through April 30.

On the lands described below:

Entire Lease

For the purpose of:

Preventing adverse impacts that would cause significant displacements of deer or elk herds or loss of habitat as described in the Diamond Mountain Resource Management Plan and EIS. Waivers, exceptions, or modifications to this limitation may be specifically approved in writing by the authorized officer of the Bureau of Land Management if either the resource values change or the lessee/operator demonstrates that adverse impacts can be mitigated. Any changes to this stipulation will be made in accordance with the land use plan and/or regulatory provisions for such changes. (For guidance on the use of this stipulation see BLM Manual 1624 and 3101 or FS Manual 1950 and 2820.)

LEASE NOTICE – HIGH POTENTIAL PALEONTOLOGICAL RESOURCES

The lessee/operator is given notice that the lands in this lease have been identified as having potential paleontological resources. Modifications to the Surface Use Plan of Operations may be required in order to protect paleontological resources from surface disturbing activities in accordance with Section 6 of the lease terms and 43 CFR 3101.1-2.

- (2) The animals are not present in a specific project location or;
- (3) The activity can be conducted so as to to adversely affect the animals.

Off-site mitigation may be required when unreclaimed disturbance caused by activity totals more than ten acres in two years. The off-site mitigation must be within the known habitat, but not necessarily within the crucial habitat area. Off-site mitigation will include seeding or planting vegetation favorable to deer. Revegetation must be established within five years after project completion. Revegetation must be with species palatable to deer and will be deemed successful when seedings are established and tending towards the density that existed before the surface was disturbed.

The following stipulation applies to SW, SWSE Sec. 5:

CRUCIAL DEER WINTER RANGE: Closed to surface use during the crucial winter use, December 15 to April 30. This seasonal condition would not affect maintenance, and operation activities for production.

The authorized officer may grant exception on a case by case basis if it can be shown that:

- (1) Legal rights would be curtailed;
- (2) The animals are not present in a specific project location or;
- (3) The activity can be conducted so as to to adversely affect the animals.

Off-site mitigation may be required when unreclaimed disturbance caused by activity totals more than ten acres in two years. The off-site mitigation must be within the known habitat, but not necessarily within the crucial habitat area. Off-site mitigation will include seeding or planting vegetation favorable to deer. Revegetation must be established within five years after project completion. Revegetation must be with species palatable to deer and will be deemed successful when seedings are established and tending towards the density that existed before the surface was disturbed.
